

Pregnancy Guidelines

These guidelines are to be followed in administering this policy on pregnancy:

1. The principal of the school will be involved personally in the handling of all pregnancy cases and be responsible for administering these guidelines.
2. The pastor and parents/guardians of the students involved shall be fully informed before any action is taken.
3. Both the female and male students should receive appropriate professional counseling.
4. The young woman is expected to remain in school until her personal physician indicates in writing that she needs to stay home. She should receive regular medical care and the school should receive documentation of that fact.
5. The young woman may continue her extracurricular activities unless or until her personal physician requires otherwise for her own health or safety or that of the baby.
6. During the time that the young woman is required by her physician to remain home, arrangements for alternative instruction will be made in order that she may continue her education.

Policy

Revised: January 27, 1994

NCD/Bishop of Harrisburg
